## CEILING MOUNTABLE LAMP

Air and surface UV-C disinfection

Disinfect and decontaminate rooms after hours or during breaks. The disinfection cycle can be completed in less than 10 minutes.

UV Photons UVC disinfection lamps are evenly and strategically spaced in the ceiling for maximum coverage to eliminate shadowing and deliver pathogen-lethal UV dose.

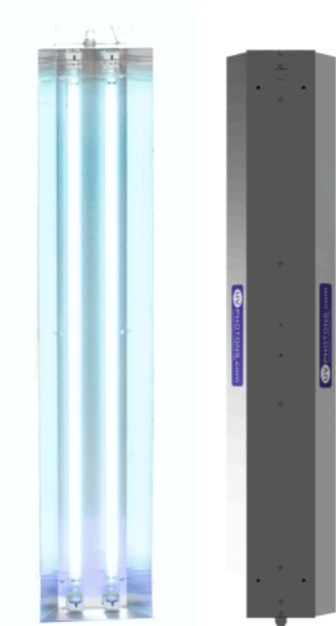

UV Photons lamps connect with motion detectors, timers, and contact doors detectors to ensure the room is closed and unoccupied when the UVC lights are operating.
